The scale of this chart series is 1:1,461,000 (3.0" per degree of longitude) at the Equator. These charts are compiled on the Mercator projection. They are outline-type charts showing shoreline, principal drainage, five-degree graticule, international boundaries, principal cities, and feature names in black. The land area is tinted in buff. The one-degree graticule is in a black screened pattern for subdued effect. Names on land areas are shown where possible. The bathymetry is shown by 100 and 1,000 fathom curves.
